NOTES

The boat limit for high risk species has been removed and replaced with new bag limits – a boat limit of **2 dhufish** does however apply

Anglers are required to carry a **release weight** when fishing for demersal species

Anglers will be required to hold a **fishing licence** effective from March 2010

There are more species included in the **seasonal closure** than listed here in the MAAC Species List. Anglers should familiarise themselves with the relevant fishing rules and regulations published by the Department of Fisheries.

Only species listed here will be eligible for weigh-in on Marmion Angling club competition days.
